AUTO-BELAY DEVICE RULES

The following rules must be understood and adhered to.

An initial instruction by our staff is mandatory!

1. Minimum weight is 10 kg - maximum weight is 150 kg.
2. The climbing harness must be fitted and secured correctly.
3. The carabiner of the auto-belay device must be attached onto the belay-loop of the harness and has to be locked properly.
4. Perform a self-check - either pull on the webbing and release it or conduct a sit-down test at a maximum height of 1m.
5. Do not climb faster than the auto-belay device can retract.
6. Recognize and avoid the risk of swinging. Only climb routes specifically designated for auto-belay use.
7. Never climb above the auto-belay device.
8. Ensure that the landing zone is clear. Warn others if it's not.
9. What to do if the auto-belay device no longer retracts?
   - Downclimb if possible.
   - If the device fails to lower, call for assistance immediately.
10. If other guests would like to use the auto-belay, please do not occupy it for too long.
